

# 32 SERIES AIRBEAM® SHELTER

*A Large, Clear-Span  
Multi-Function Shelter*

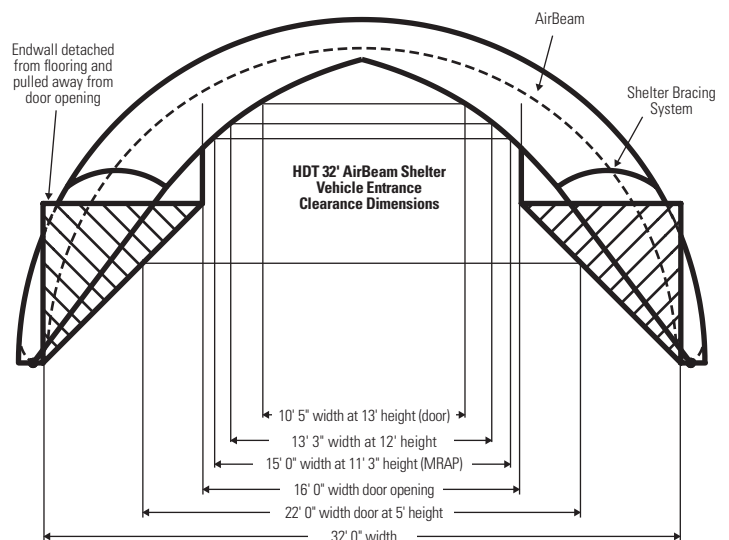

The evolution of the US Army's Premier Base Camp, Force Provider, has led HDT to develop the next generation rapidly deploying, modular, large-span shelters.

HDT's 32 Series AirBeam shelter is suited to a variety of applications:

- **Command and Control:** With an integrated liner that provides a clean workspace, the 32 Series AirBeam shelter lends itself well to large scale C2 operations. The liner includes a preinstalled floor, electrical wiring harness, and air distribution plenum, contributing to a quick and easy deployment. The clear span shelter optimizes floor space and provides maximum obstacle-free operator workspace, and the shelter is equipped with six doors for maximum modularity.
- **Maintenance:** HDT's 32 Series AirBeam shelter has an internal height of 15 ft. (4.6 m) making the structure an ideal solution for vehicle/equipment maintenance. HDT's 32 Series maintenance enclosure is a rapidly deploying, highly durable facility that is capable of accommodating the largest wheel and track vehicles. The inherent modularity allows for simple complexing to provide additional clean-room workspace or tool storage.

- **UAV Hangar:** The rapidly deploying clear span that the 32 Series AirBeam shelter provides is ideal for UAV hangar applications. HDT's modular approach allows the Ground Control Station to be connected to the hangar / storage facility or used in a remote location. HDT's shelter systems provide environmental protection for a range of UAV platforms.
